

Lubricator King®
Single Point Automatic
Lubricator
(Wastewater Treatment
Plants)

Increase the lifespan of equipment with
Lubricator King®

During the complex cleaning processes which take place in wastewater and sewage treatment plants, mechanical parts such as chains, bearings and guides come into contact with water containing waste, phosphates and acidic substances. The weather also has a major impact on equipment and facilities. Without regular lubrication, the parts will wear out faster, causing the equipment to stop working properly and necessitating expensive repair work. For this reason, continual lubrication is vital.

Lubricator King® automatic single-point lubricator is ideal for ensuring a regular supply of lubricant to the lubrication points. Permanent, automatic lubrication protects the metal surfaces against corrosion and reduces friction and wear. The use of Lubricator King® lubricators significantly reduces maintenance costs in wastewater and sewage treatment plants, while at the same time increasing the lifespan of mechanical parts.

The Professional Automatic Lubricator Supplier:

Lubricator King® Sole Distribution

Efficiency

Lubricator King® Distributions C.C.

Your Professional Automatic Lubricator Partner ^(since 2007)

Our company was founded in 2007 as GreaseMax SA and in 2013 our Company Improved our Product Design and Safety Features and are the Sole Distributors of Lubricator King® Automatic Lubricators ever since. Lubricator King Distributions C.C. is the only direct TUV-International Registered Sole Distributor of Automatic Lubricators in South Africa, distributing Fail-Proof Automatic Lubricators since 2007 and we Specialise in Ultra Low Costs, Qualified Management and Highest Level of Professionalism for Successful ROI for all our Retailers and Clients.

Lubricator King® Automatic Lubricators increases Machine/Equipment availabilities, improves Bearing- & seal performance/life, saves Major costs (&time) to companies. Lubricator King® dramatically improves the Overall Efficiency of Maintenance and Lubrication strategies, at Lowest Cost to client. Lubricator King® Eliminates Contamination Risk to bearings Etc.

The Characteristics making Lubricator King® Fail-Proof and Most Professional Automatic Lubricator Internationally:

- Lubricator King® is **Tribology Engineered** Automatic Lubricator and provides a constant film of Grease.
- Lubricator King® is a Strong Single point Automatic Lubricator proven to **push grease one Meter+** via an extension line successfully, at a **constant discharge rate and in any direction**. Lubricator King® has a 80 -150 PSI strength pressure and thus blockages is never a problem.
- Lubricator King® has a **Zinc / Steel Body** and the **Leading Safest Lubricator for Underground Operations. The Only Chemical Lubricator with a** High Density Polyethylene (HDPE) point that cannot be easily broken, like other lubricator points.
- Lubricator King® has **NO settings** - Lubricator King® has **Four (4) Individual / Color coded Units**, each designed for catering for precision interval greasing to all the different Shaft size ranges / applications. Lubricator King® are the Only Lubricator with **Clear Operating Period Identification printed on all our Unit Labels to avoid any Human Error**.
- Lubricator King® has **NO batteries (Radio Active waste), NO preset Gas Cells, NO springs** or mechanical parts and use **NO electric components** that have proven to Fail historically. **Lubricator King® is the Newest Range of Patented, Fail-Safe, Chemically Operated, Truly Automatic Lubricators without variables.**
- Lubricator King® is the Only Chemical Lubricator that **is completely Sealed and Tamper-Proof** after Activation. Lubricator King® is **Not Pre-Pressurised** and Total Components of **Lubricator King® poses NO Environmental Risk**. Lubricator King® post-use is Environmentally recyclable and could be disposed of via Client's own Industrial waste (and still be ISO 14001 Compliant).
- Lubricator King® Can be **mounted in ANY Position** and anywhere, **even under water!**
- Lubricator King® is Fast, Simple to use and SAVES a lot of Time, activates in One simple Step** and we have only an easy one page installation Instruction. **Lubricator King® has lowest cost vs. ROI, proven & referenced performance** and Internationally considered **The Automatic Lubricator King!**
- Lubricator King® is not just a Lubricator, It's The Total Solution Package:**

Lubricator King® is the Only Sole-Distribution Head-Office Providing Lowest Unit Cost And-

- *Free Qualified Project Management Services for Full Integration into Maintenance Strategies, for Clients who Standardise their sites on Lubricator King® Automatic Lubricators.
- *Free Training of all Team Members who will be using Lubricator King®.
- *Free A1 Laminated Visual Maintenance Team Posters to track Installation dates.
- *Free ISO9002 Quality Equipment Identification Sticker-Tags.
- *Free 24hr Technical Support
